

Tamarack Solar Energy Center

The Tamarack Solar Energy Center is a proposed 150 megawatt (MW) solar power generation facility in Marshall County, Indiana. Solar technology delivers clean, reliable, and affordable power from one of the oldest known energy sources and today is helping to modernize America’s energy grid.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community’s health and safety.

Project Timeline

Project Highlights

More than **\$100 million** invested in local tax revenue, land costs and lease payments over the life of the project, including **\$20+ million** paid to local schools

150 MW is enough electricity to power more than **29,000 American homes**

Up to **175 jobs** supported during construction

Up to **2 full-time** operations and maintenance staff

Emissions reductions equivalent to **70,000 trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy’s 100th project, Southern Oak Solar Energy Center, located in Mitchell County, Georgia.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$573 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
